

***Position Available:
McGill University
Clinical Thrombosis Fellowship 2016-2017
Jewish General Hospital
A McGill University Teaching Hospital
Montreal, Quebec, CANADA***

The Jewish General Hospital's Thrombosis Program is an active, academic, tertiary care subspecialty service. Our Thrombosis physicians comprise a multidisciplinary, collaborative group that includes hematologists, internists and pulmonologists, with close links to related specialties such as vascular surgery, cardiology, neurology and obstetrics. A number of us also have training in clinical epidemiology.

Our Thrombosis Program encompasses a broad range of clinical and research activities that relate to diagnosis, risk factors and treatment of venous and arterial thromboembolic disease, management of thrombophilia and issues pertaining to long-term anticoagulation. Specific areas of clinical activity include the Thrombosis Clinic, Anticoagulation Clinic and In-patient Thrombosis Consultation Service. Our Program is an integral component of the Jewish General Hospital's Centre of Excellence in Thrombosis and Anticoagulation Care (CETAC)

We are currently accepting applications for a one year clinical fellowship (July 1, 2016- June 30, 2017) to acquire and consolidate expertise in Thrombosis.

This Fellowship position is recognized and approved by McGill University's Faculty of Medicine and requires application via McGill Postgraduate Medical Education **by Sept. 1, 2015** (http://www.medicine.mcgill.ca/postgrad/admission_nonministryfunded.htm). **Please note this site will only accept applications as of May 15 of each year.**

Applicants could include trainees interested in Thrombosis Medicine who have completed specialty training in relevant specialties, e.g. Hematology, General Internal Medicine (GIM) or Respiriology. For GIM trainees in Quebec, this fellowship could be done as your R5 Year (subject to approval by your Program Director).

During the fellowship, the trainee will acquire knowledge of the physiology, pathology, diagnosis and treatment of thrombotic diseases through a variety of activities, including direct inpatient and outpatient care and exposure to pertinent diagnostic laboratory and imaging facilities. The trainee will be assigned to the in-patient Thrombosis Consult Service as well as the outpatient Anticoagulation and Thrombosis Clinics, where he/she will be directly supervised and taught by Thrombosis attending physicians during all rotations. For interested candidates, a broad range of research opportunities in various aspects of Thrombosis are available as well, with the possibility to extend training for a second year.

For more information on the McGill Thrombosis Fellowship, please send a 1-page expression of interest and your CV to Dr. Susan Kahn, c/o maureen.morganstein@ladydavis.ca
