

## AstraZeneca COVID-19 Vaccine Statement

(Toronto, Ontario April 26, 2021) - Thrombosis Canada acknowledges the recommendation of the National Advisory Committee on Immunization (NACI) that the AstraZeneca SARS-CoV-2 vaccine may be offered to individuals 30 years of age and older. [[NACI Statement Link](#)]

Thrombosis Canada, alongside NACI and other healthcare organizations in Canada, is closely monitoring emerging evidence on the safety of the AstraZeneca vaccine and will provide timely updates to healthcare professionals and the public to enable informed decisions about the administration of this vaccine.

In the meantime, Thrombosis Canada continues to strongly recommend that all eligible adults receive the AstraZeneca and Johnson & Johnson (Janssen) vaccine, including people with a prior blood clot, those with a blood clotting tendency (e.g., factor V Leiden mutation), and people who are receiving blood thinners as the benefits of receiving the vaccine far outweigh the risks.
